quality electric fires built in britain

e-series

2018/19

The e-series is our award winning modern day range of built in electric fires, powered by the very latest LED lighting technology.

The simplicity of the e-series enables absolute freedom to create and design individual feature fireplaces, as it is electrical there are no limitations to where a e-series product can be installed.

With a choice of effect sizes, from 500mm to 1800mm as well as two or three sided glass models the e-series offers greater scope and choice to any installation.

Both evoflame® & evoflame ultra hd® products are operated by the App function, a e-touch® control system is available as a optional extra.

e-touch

The e-touch app is available to download on the Apple App store or Android Google Play.

The e-touch® allows complete controllability of any e-series product.
The control system is a fully portable, rechargable bluetooth based touch screen unit.

At CK Fires our policy is one of constant development and improvement. All products are protected by patents, registered design or intellectual property rights, which will be protected by CK Fires. All specifications are correct at the time of publishing but are subject to change without notice.

The **evo**flame ultra **hd**® has the same features as the **evo**flame®, but utilises the latest in non reflective SCHOTT CONTURAN® MAGIC glass technology.
Additionaly it features a unique flicker effect that adds realism and movement to the fuel bed.

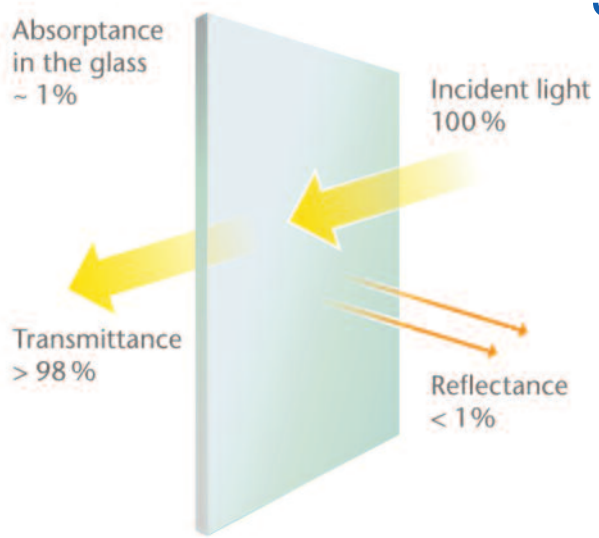

evoflame® ULTRAHD

evoflame® technology

SCHOTT CONTURAN® MAGIC

evoflame ultra **hd**® products use SCHOTT CONTURAN® MAGIC glass that has optical interference properties, and is coated to reduce surface reflections optically by up to 90% making the glass appear invisible.
